Chazy & Westport Communications Launches CW Mobile

Westport, NY — April 9, 2026 — Chazy & Westport Communications today announced the launch of CW Mobile, a new wireless service available exclusively to existing internet customers within its service area. CW Mobile offers affordable rates, with additional savings when bundled with internet.

Through a partnership with the National Rural Telecommunications Cooperative, CW Mobile operates as a mobile virtual network operator (MVNO), delivering nationwide voice and data service over the Verizon Communications network. By leveraging existing infrastructure, CW Mobile provides the same reliable coverage and performance as major carriers—at a more accessible price point.

Marketing & Sales Director Deirdre MacNerland says:

“We’re proud to introduce CW Mobile—a reliable, high-quality solution designed to make everyday connectivity more affordable. As a company, we’ve transitioned our own team from traditional Verizon plans to CW Mobile and are seeing savings of \$30–\$40 per line each month—without sacrificing performance. We’re also offering the first three months free, so customers can try it risk-free.”

CW Mobile is available to Chazy & Westport Communications internet customers in Westport, Wadhams, Lewis, Elizabethtown, West Chazy, Chazy, Beekmantown, and Altona.

To learn more, visit chazywestport.com/mobile, stop by our offices in Chazy or Westport, or call 518.962.8211.
